

Part Number Nomenclature

ALBION®

Caster Nomenclature:

16PD06201S

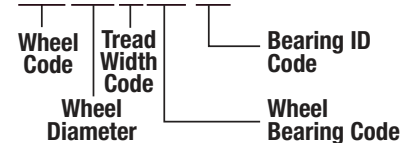

Above example 16PD06201S is a 16 Series (16) swivel caster (S) with Polyurethane/Aluminum core wheel (PD) and straight roller bearing (01). The wheel diameter is 6" (06) x 2" tread width (2). Options go on second line with space between each, for example:

16PD06201S
CB16 SS02

Caster above with an additional cam brake (CB16) and swivel seal (SS02).

Wheel Nomenclature:

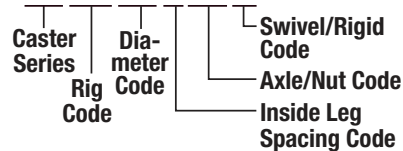

PD0620112

PD0620112 is a Polyurethane/Aluminum core (PD) 6" (06) x 2" tread width (2) with 3/4" (12) straight roller bearing (01).

Fork (Rig) Nomenclature:

16YA06201S

16YA06201S is a 16 Series (16) swivel (S) rig (YA) with a fork designed for a 6" (06) x 2" (2) wheel that does not include axle or nut (01). This rig will accommodate the above 6" x 2" PD wheel.

colson®

Caster Nomenclature:

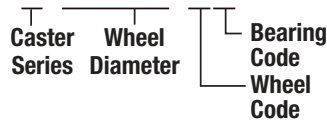

2.03256.95

The above caster model number is a 2 Series caster (2) with swivel top plate fork (256) for a 3 1/2" (03) diameter polyurethane tread wheel (HI-TECH) (9) with a ball bearing (5). Note in this case the (256) fork code designates the wheel to be 3 1/2" diameter instead of 3" (356). Options are to right of Wheel/Bearing Code with space in between. For example: **2.03256.95 BRK1** includes a Top Lock Brake. Note: The **replacement fork** model number is the same as above except the wheel suffix is not included. (For example 2.03256).

Colson Wheel Nomenclature:

2.00004.95

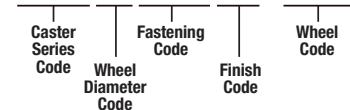

The above wheel model number is a 2 Series (2) wheel with a diameter of 4" (00004) with polyurethane tread (9) and ball bearing (5).

shepherd®

Caster Nomenclature:

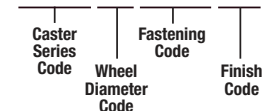

PRE50273ZN-TPR

Example model number shown is a Regent caster (PRE). The wheel diameter is 5" (50). The fastening is a grip ring stem (273). The caster fork finish is zinc (ZN). The wheel is a TPR (TPR). Options are listed to right of caster model. For Example **PRE50273ZN-TPR B** caster has an optional tread lock brake (B).

Fork Nomenclature:

PRE50273ZN

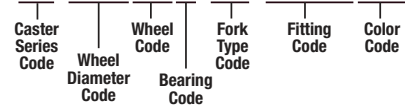

Example model number shown is a Regent caster (PRE). The wheel diameter is 5" (50). The fastening is a grip ring stem (273). The caster fork finish is zinc (ZN). Since there is no fork code, it is considered fork only. Note: Shepherd wheel codes are arbitrary part numbers and do not follow a nomenclature.

MedCaster®

New Model System Caster Nomenclature:

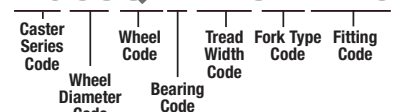

HT125PYPTL-RS01GG

The above caster model number is a HT twin wheel (HT) with a 125mm diameter (125) Polyurethane TPU (PY) wheel with a precision bearing (P). The fork is total lock (TL) with a round stem (RS01). The color is grey tread and grey core (GG). Options are to the right of model, for example: **HT125PYPTL-RS01GGILSSCOND** is the same caster above, but mounting hole is inline to direction of travel (IL). The construction is stainless steel (SS) and the caster is conductive (COND).

Legacy Model System Caster Nomenclature:

NG05QDP125DLTP01

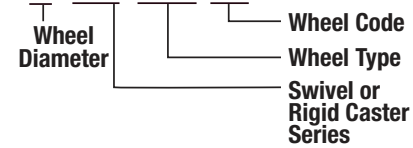

The above caster model number is an Nylon NG (NG) with a 5" diameter (05) by 1 1/4" tread width (125) Quik-Start wheel (QD) with a precision bearing (P). The fork is direction lock (DL) with a top plate (TP01). Options are to the right of model, for example: **AV05QRP125DLTP01SS** is the same caster above, but made with stainless steel construction (SS). Fork less wheel model numbering system is similar to caster numbering system, except no wheel/bearing code; **AV05125DLTP01**. Wheel numbering is similar to casters, but deletes fitting code and everything to the right; **AV05QRP12504**. Last two digits are a special axle code.

darvis®

Caster Nomenclature:

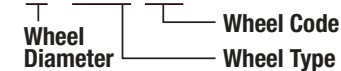

5-30-213GF

The above caster model number is a 5" (5) 30 Series caster (30) with an Advantage wheel (213) which is grey (G) and has a flat tread (F). Note the rigid versions add 1 to series. 30 series swivel uses 31 series rigid. Options would be to right of Wheel Code with space in between. For example: **5-30-213GF VL** includes a Vertiloc brake.

Wheel Nomenclature:

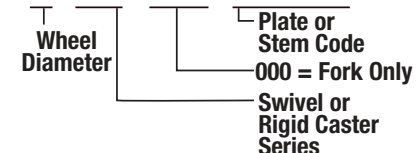

5-213GF

The above wheel model number is a 5" (5) Advantage wheel (213) which is grey (G) and has a flat tread (F).

Fork Nomenclature:

5-30-000-PLT 2

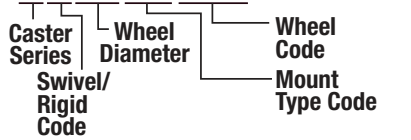

The above caster fork fits a 5" (5) 30 Series caster (30) with a #2 top plate.

PEMCO®

Caster Nomenclature:

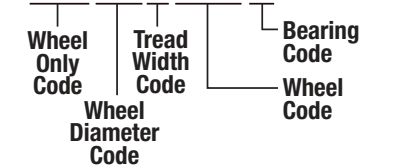

AS30P1TPR

The above model is an A-Line (A) swivel (S) top plate caster (P1) with a 3" (30) Thermo Rubber wheel (TPR). Options would be to right of Wheel Code. For example: **AS30P1TPRTL** includes a total lock brake.

Wheel Nomenclature:

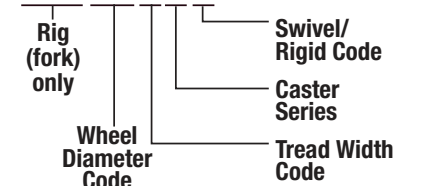

WH6X2TPDR

The above wheel model is an E Series (WH) 6" (6X) diameter x 2" tread (2) width Thermo-Rubber Donut (TPD) with a roller bearing (R).

Caster Nomenclature:

RIG6X2ES

The above model is an E-Line (E) swivel fork (S) that will fit a 6" (6X) diameter x 2" tread (2) wheel.
